New Members Arrive!

The Phantom Catz are finally back in person after a year and a half online! Due to the circumstances, it's more important than ever to make sure everyone is properly prepared, as we have many new members this year. That's why the primary focus of many of our sub-teams is new member training. This year, our outreach team is working on the FIRST Lego League. They are training 10 elementary school girls in order to partake in the competition. This is very important to us as we strongly believe in empowering everyone in STEM. Phantom Catz are also preparing for our first scrimmage of the year called Beach Blitz!

Subteam Logs

A weekly update from each of Team 2637's individual subteams

Systems:

Manufacturing: Manufacturing is working on Anti-Sigma and CSD robots, and training new members.

Design: Returning members of Design are working on R&D of the robots and training new members as well.

Programming: Returning members are testing code on the robot and new members are being trained.

Electronics: Training new members, inventory, attaching motor controllers.

Business: Business is training new members.

Outreach: Training elementary school girls about STEM for FLL competitions.

Safety: Training New members about safety.
